**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmerman (US 20040186141 or 10/485,093; 01/26/04). Zimmerman suggests a pesticidal formulation comprising prothioconazole and chloropyrifos. See pages 35-36 of instant specification. Zimmerman does not exemplify a composition comprising prothioconazole and chloropyrifos. However, it would have been obvious to make a single composition comprising prothioconazole and chloropyrifos. One would have been motivated to do this since the prior art suggests the combination. Applicant data provided for the combination is not convincing to the Examiner. Data does not appear to show synergism for the composition comprising prothioconazole and chloropyrifos.

***Claim Objection***

Claims 2,4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Applicant provides synergistic data for compositions comprising prothioconazole plus fipronil or thiamethoxam.
